If you are interested in KA2 – CBHE, please describe your project idea shortly:			
<p>1. Development of a better model for coordinated technology and knowledge transfer, where universities must play a crucial and principal role. The main objectives of the project could be: development of capacity building model for technology and knowledge transfer in HEIs in partner countries/MD; exchange of best practices to improve the related activities, i.e. start-ups and spin-offs; design joint methodologies to be applied in AT and the partner countries/MD; achieving transnational system to exchange scientific and technological result coming from R&D&I in the different HEIs.</p> <p>2. Enhancing and modernization of institutional management of internationalisation. The aim of the project: based on the EU partners experience to develop an internationalization management model which will provide appropriate knowledge and means to improve internationalization actions and activities that contribute to the further development and to the sustainability of the international dimensions in the university / (Partner Countries Universities). The main objectives could be: measurement of the degree of university internationalization and identify areas for improvement; study and disseminate good practices in benchmarking analysis applied to university international relations; set guidelines to establish appropriate framework for internationalization, and to create the required infrastructure to implement a clear internationalization strategy; build the capacity of university on internationalization procedures.</p> <p>3. Regional (Moldova-Romania-Ukraine) Scientific-Educational Centre on Advanced Materials at the MSU provides a framework to perform advanced research in various areas of science and technology, such as conventional materials (microfilms, crystals and powders) and advanced ones like nanostructures with distinct properties, based on structural studies (XRD with unique parameters), photoelectric and transport phenomena research, luminescence, semiconductor-based structures and devices, as well as various technological equipment for obtaining crystals, nanocoatings etc. We are interested in extending the international collaboration, within this Centre, of the MD-RO-UA partner-universities with Austrian HEI's and research laboratories with state-of-the-art developments. In this context, a potential KA2 project could to be the project under which institutions in the MD-RO-UA region will collaborate increasingly with Austrian counterparts.</p>
